Avanti Communications

Avanti Communications is the leading KA-band high throughput satellite capacity partner to the communications industry across EMEA focused on driving connectivity across Africa.

Our mission is to work in partnership with the people of Africa to empower growth, protect communities and unlock opportunities for individuals, businesses and governments, by creating better connections across the continent.

Avanti recently launched Avanti EXTEND, a new managed service for rural connectivity. Avanti EXTEND provides high-performance and cost-effective 2G, 3G and 4G solutions to remote and hard-to-reach areas across sub-Saharan Africa. This enables MNOs and Tower Companies to provide reliable cellular service to the 100 million people living in these challenging locations that would otherwise be impossible to reach using traditional terrestrial infrastructure.

Expertise, Resources and a Proven Track Record

At Minara Tanzania, our robust wireless communications infrastructure portfolio, combined with our multi-tenant leasing model, allows us to provide mobile network operators with an array of towers and other assets that help meet their coverage and capacity needs.

We are leading the way in providing wireless communications infrastructure, with wireless service solutions that help carriers meet current and future network demands including:

- Towers – A portfolio of 1,400+ towers with locations and heights to fit your coverage needs
- Rooftops – Our extensive rooftop portfolio at premium sites in major urban areas help you increase network coverage and capacity
- Indoor DAS – Our system enables property owners to install one wireless infrastructure solution supporting all service providers and frequencies
- Green Power – Renewable energy solutions to power telecom towers as an alternative to diesel generators

As a preferred communications infrastructure provider, we are continuously setting the standard for customer satisfaction by “Building Better Wireless.”©

The organisation delivers integrated Solutions for Society that are aligned with customers’ priorities to create new value for people, businesses, and society, with a special focus on safety, security, and efficiency. Our portfolio addresses Africa’s modern challenges via solutions for Infrastructure, Safety, Communications, and Digital via managed and professional services, maintenance and support, and our project management office (PMO).

We deliver one of the industry’s strongest and most innovative portfolios of communications, analytics, cyber security, biometrics, and technologies that unleash customers’ productivity potential. Through these solutions, NEC XON combines its best-in-class portfolio of technologies, leveraging a robust partner ecosystem to solve today’s most complex business problems.

NEC XON combines the best people, skills, solutions, and services of XON and NEC Africa. The two organisations partnered in 2015 to ensure that customers get the maximum value from their technology investments. This close association provides deep integration skills and experience with global technology leadership. It also continues a proud association with African businesses that reaches back to 1963.

That rich heritage extends the benefits of longstanding global best practice, African expertise, and regional partnerships and delivery to our customers. In South Africa, they also benefit from our Level 1 B-BBEE certification via Kapela Capital.

Guide to Retail Value Management

Digitizing Telecoms with Seamless

Why Customers Trust Us

Smart Sales & Distribution - SDS Analytics

As pioneers of digital reform, Seamless Distribution Systems (SDS) has consistently delivered high-performance solutions to telecom operators and retail distributors for over 30 years and counting. Our solutions enable digitalization of the entire distribution chain, for multiple products and through multiple channels, customized according to a business's unique needs.

Our core expertise lies in helping our customers grow revenue through the power of digitalization. We combine years of experience in understanding our customers' needs, pain points and business goals around sales and distribution and leveraging automation and advanced analytics to help them achieve sales growth and OpEx optimization. We are driven to synergize distribution management for telecoms as we solve a variety of problems that impact different stages of the user journey.

Throughout this time, we have been obsessed with bringing unmatched efficiency across the value chain and helping converge all critical processes around sales and distribution in one integrated solution. Our end-to-end offerings facilitate the launch and growth of both direct and indirect channels while unifying customer experience across the board to ensure that telecoms never fail to deliver.

About Us

Services

Channels

Contact Us

Es'hailSat, the Qatar Satellite Company, was established in 2010 to deliver satellite services to broadcasters, telcos, enterprises and governments in the MENA region and beyond.

With a goal to be a truly global satellite operator and service provider, Es'hailSat commenced operations with Es'hail-1 in 2013, supporting key broadcasters, beIN Sports and Al Jazeera Media Network. Es'hail-2, the company's second satellite was launched in 2018 and is co-located with Es'hail-1 at the MENA hotspot of 25.5°E/26°E orbital location. Es'hailSat's high-powered satellites with Ku-band and Ka-band capabilities, provides the region with advanced and sophisticated services.

Es'hailSat's Teleport in Doha provides satellite Telemetry, Tracking and Command (TT&C) operations and capacity management, along with teleport services such as uplink, downlink, contribution, multiplexing, encoding, playout, VSAT services, hosting services, data centre and other services.

Es'hailSat plans to expand with newer satellites in other prime orbital locations around the globe, offering customers the most flexible and reliable services.

Express-AM8, 14°W

Russian Satellite Communication Company (RSCC) is the Russian GEO satellite operator with global coverage. RSCC is one of the ten largest world satellite operators in terms of satellites and orbital slots. RSCC satellites are positioned along the geostationary orbital arc from 14° W up to 140° E, covering the entire territory of Russia, CIS, Europe, Middle East, Africa, Asian-Pacific region, North and South America, and Australia.

RSCC provides a full range of communications and broadcasting services via its own terrestrial telecom facilities and satellite constellation, which consist of modern Express, Express-AM, Express-AT, Express-AMU type satellites; e.g. video distribution and contribution, DTH, DSN, broadband Internet access, IP trunking and cellular backhaul, maritime mobility, in-flight connectivity, SCADA, enterprise networks connectivity and other. The company operates various regional satellite TV distribution networks and corporate VSAT networks for fixed and mobility customers throughout Africa and in other parts of the world.

C-Com Satellite Systems Inc

2574 Sheffield Road
Ottawa, Ontario, Canada
K1B 3V7
+1 613 745 4110

Over the past 24 years, C-COM has been a world-leading provider of high-quality, reliable auto-pointing satellite antenna systems. The company is now in the final stages of development of a potentially revolutionary Ka-band, electronically steerable, modular, conformal, flat panel phased array antenna.

Stratosat Datacom forms part of the German based SCHAUBURG International Group, which is a fast-growing family business with more than 30 affiliated companies worldwide. Investments are focused on niche technologies in electronics, plastic processing, engineering and industrial solutions on a global scale.

Stratosat Datacom, established in 2002, provides cost effective tailor-made turnkey satellite and microwave communication solutions in Sub-Sahara Africa. We have rendered products and services to the majority of Telco and Satellite Operators in Africa.

Our customer focussed team provide expertise in equipment supply, installation, systems integration, commissioning, handover, training, maintenance, support and network monitoring.

Stratosat's main solution offerings are:

- High-Speed Satellite Managed Broadband Connectivity, Mobility (CoTM & CoTP),
- Managed Services,
- Tailor-made Communication Network Solution Design, Project Management,
- Satellite Equipment Supply & Distribution and Implementation & Management of Large Astronomy Projects (SKA / MeerKAT).

Put Our Capabilities to Work for You

SBA South Africa is a preferred provider for mobile network operators. Our experience, capabilities and resources assist carriers to meet their network coverage, capacity and performance requirements. Working with our experienced team ensures speed to market while helping carriers provide high quality, feature-rich voice and data service.

SBA South Africa is a leader in providing wireless communications infrastructure including towers, buildings and rooftops, with more than 1,000 communications sites throughout the country. We offer wireless service solutions that help carriers meet current and future network demand while remaining flexible with build times and design including:

- Site Leasing – leasing antenna space on our multi-tenant towers under long-term lease contracts.
- Site Development – Constructing towers in strategically chosen locations or at the request of wireless carriers under a build-to-suit arrangement.

As a preferred provider for mobile network operators, we are continuously setting the standard for customer satisfaction by "Building Better Wireless."®

Mobile Mark is a leading supplier of innovative, high performance antennas to wireless companies across the globe. We've been in the wireless industry for over 30 years and have our roots in the early Cellular trials. We have grown and evolved over the years, along with the industry. Today, we benefit from enhanced design capabilities and expanded production capacity – along with a greater understanding of new and emerging markets – all of which have allowed us to become one of the best antenna developers in our field. Our customers have been our partners throughout the years. We believe in taking the time to understand our customers' individual needs. Through close consultation with clients, we are able to deliver innovative, tailored solutions that meet specific antenna requirements. Rapid prototyping capabilities allow us to take our designs from concept to reality in an extremely short time span, and to verify the performance of the antenna. Mobile Mark antennas are used in many sectors of the wireless industry. Here are just a few examples:

- Emergency services
- Commercial fleet management
- Public transport & bus management
- Smart cities & smart highways
- Remote monitoring & surveillance
- Mining & exploration
- Asset tracking & RFID
