

FEATURES LIST 2022

NORTHERN AFRICAN WIRELESS COMMUNICATIONS

Happy New Year and welcome to the Northern African Wireless Communications features list 2022! Below is our plan for the coming year, but we do sometimes change what we cover as we react to what is happening across the continent and indeed the world.

The features list also includes online contributions we're seeking during the year ahead. It's important to remember that editorial inclusion is at the editor's discretion and carries no charge because relevant, focused, independent and informed content is the key to our strong and active readership.

Since the magazine launched in 1999, it has been a must read for the sector. Apart from news and analytical features, it contains case studies, products and opinion pieces from some of the most influential people in the region. With comment pieces becoming so popular, we've decided to skew our content so it is more features-led. News will remain critical as it sets the agenda and is what opinions are usually predicated on. In fact, we want more of it to populate www.africanwirelesscomms.com freeing up the magazine for these thought led-pieces. Here are the regular columns and comments with some new spotlights on operators in the region and country profiles – do contact us if you'd like to get involved with any of these!

Please also bear in mind our readership. Each reader either influences, specifies or purchases wireless communications equipment, services and infrastructure – including associated consultancy, systems integration, as well as test, measurement and maintenance equipment.

News & Analysis

A close look at what's going on in the north, east, west and central parts of the continent

Wireless Business

Financial reports, deals, who's hiring and who's firing

Wireless Solutions

New products and services available to wireless users

Wireless Users

Case studies highlighting customer and sector success stories across the continent

Industry View

Comment from an industry luminary on the issues impacting wireless comms

Talking Satellite

GVF tells us what's hot in satellite as each issue goes to press

On the Network

A more technical analysis of what's going on in the sector

Q&A

A soft feature with a C-level industry luminary, in which they talk about their life

Country by Country

Focus on an individual nation and how it is progressing in the wireless space

View from the Top

An opinion/thought leadership piece penned by senior managers, in which they offer strategic commentary

Talking Critical

A regular column from the critical comms arena

In addition to the above, we also have the African Wireless Communications e-newsletter, which combines the best content from each magazine and the website. Even if your content doesn't make the magazines, we are keen to populate our website with news and comment on the topics below and are open to any ideas you may have, so please contact us.

DECEMBER-JANUARY 2022
