MainOne to extend subsea cable in West Africa with Orange support

08 November 2018

MainOne Company will partner with Orange to extend its submarine cable system in West Africa.
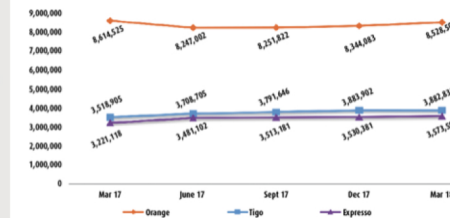

MainOne's current system comprises a 7,000km submarine cable and was launched in 2010. Under its partnership with Orange, the company will build two new branches and stations to connect its system to Dakar and Abidjan.

MainOne's current system comprises a 7,000km submarine cable. It will work with Orange to build two new branches and stations to connect to Senegal and Côte d'Ivoire.

Community networks provide a sustainable solution to address the connectivity gaps that exist in underserved urban, remote, and rural areas, according to the Internet Society.

Vodacom Group CTO Andries Delport presents the speeds achieved in the South African trial. The tests were conducted over a live 5G mobile network in Midrand and independently evaluated by test experts MyBroadband and Ookla.
